

ATFS ANNUAL SPEECH BY:ADITYA PARMAR

ATFS is a good place to do your homework. It has really fun stuff to do like foosball. You can finish your homework faster each day. When you come back from school hungry you can buy some yummy food and eat it. ATFS is the place that specializes in math. It's a place for fun if you finish your homework and work plan and go to the games room and have a blast. You can talk with your friends and share laughs with each other. Every three weeks we have a test. It gets really intense because it's a really, really, really, really big challenge. Every once in a while we have a contest which has rewards and prizes which are super cool because there are lots of competitors (I have experience of ATFS because I have been here for one year). At the end of the year we all get goody, goody medals and goody, goody trophies. We also have a talent show.
