

Atfs Speech

Srinath Anand

Hello I am Srinath Anand, a 7th grader at Gibbons Middle School. I've been coming to Atfs since November 2007. Everyday I spend 3 long hours here finishing homework, and workplan, and still having enough time for some fun .Atfs has helped me in many ways, it has helped improve my study habits, it has also showed me the importance of good conduct. It has helped me make new friends, and meet new people. It has given me opportunities to learn new things, about math, science, and English. It has improved my grades and has made me a better person overall.

Other ways it has helped me is by letting me understand the world around me, and by giving me learning opportunities. Atfs has helped shape me as a person, and has provided me with knowledge that will aid me forever . The teachers here provide that knowledge, I believe that they should receive great recognition. ATFS is a helping and caring place.
