

Dear people of ATFS,

ATFS has helped me by helping me out. I got to learn new things. I learned that you should not always talk when doing work. It is always smart to pick the right choices. By the way my name is Mihir Shah . I have been coming for three years now. I learned a lot about Science, Math and LA. I learned how to focus better. I have benefited a lot here. I bring back better grades. I am grateful to learn to get more responsible and better behaved. In my experiences here I enjoy to have break. It is my happiest part of the day in ATFS. I like to eat food that I have and talk with my friends. I also like to relax during this time. In my time here I have become a lot smart.
